THE NORTHROP WORSTED LOOM

on goods that can be woven with one shuttle saves about twice as much in proportion as the Northrop Loom on cotton fabrics.

Compared with common looms the Northrop Worsted Loom saves from 50 to 75 per cent. of the labor cost of weaving and from two to four times as many Northrop Looms can be operated per weaver, other conditions being equal.

Manufacturers of worsted dress goods and other fabrics that can be woven with one shuttle may easily figure the saving per annum in changing from common looms to Northrop Looms.

Another important consideration is that the product per loom is greater on the Northrop than the common loom, due to the continuous operation of the Northrop and frequent stops for filling of the common loom.

The fact that only one-half to one-quarter as many weavers are required in a Northrop Loom weave-room means less trouble in keeping up production during a shortage of labor.

THAT FIRST QUALITY GOODS

are produced on Northrop Worsted Looms is best proven by the fact that they are in use in large numbers in the following well-known worsted mills:

Farr Alpaca Company
Entire loom equipment
Holyoke Massachusetts

Arlington Mills
Worsted Department
Lawrence Massachusetts

Amoskeag Manufacturing Company
Worsted Department
Manchester New Hampshire

Lorraine Manufacturing Company
Worsted Department
Pawtucket Rhode Island

Pacific Mills
Worsted Department
Lawrence Massachusetts

Wuskanut Mills
Farnumsville Massachusetts

United States Bunting Company

Lowell Massachusetts

Millbury Mills

Woonsocket Rhode Island

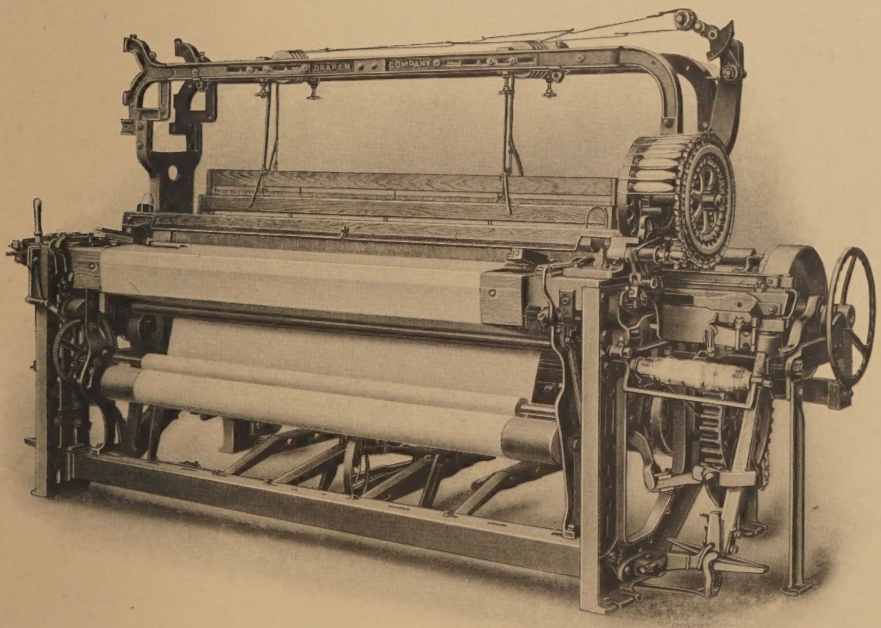
Uxbridge Worsted Mills

Uxbridge Massachusetts

Waucantuck Mills

Uxbridge Massachusetts

We reproduce on page four a recent photograph of the Number 2 weave-room of the Arlington Mills where nearly seven hundred Northrop Worsted Looms are turning out the high grade fabrics for which this mill is noted.



Northrop Worsted Loom
